

ZEABORN SHIP MANAGEMENT FACT SHEET

ALL RELEVANT FACTS AT A GLANCE

Zeaborn Ship Management is a pure third-party ship manager based in Hamburg and Singapore. We believe in Safety of people and ships, Transparency towards our customers on financial and operational matters, Asset Protection so our customers can take advantage of the market, and Reliability in performance.

We have made Safety our DNA – through Maritime Resource Management and continuous repetition of our Challenge and Intervention culture we have made vessels managed by Zeaborn Ship Management safer; and that has also saved our customers money.

Our shareholders insist on Transparency, that we open our books to our customers, who have ac-

cess to all financial and operational information on their ships.

Many of our employees come from a ship-owning background and they know very well that protecting the condition of the ships we manage serves our customers to get that charter, pass that vetting inspection, and make that vital good first impression. That is what we mean with Asset Protection.

And all of this translates in Reliability: you can count on us to do the right thing. For your ship, your investment.
